Synchronized Therapy

E8 can synchronize with Amoul® ventilators via Bluetooth to provide simultaneous ventilation. E8 CPR provides safer and high quality CPR to increase the patient’s chance of survival.

External controller monitor

· Intuitive display of compression frequency, depth, mode, timer, pause duration, battery level, and Bluetooth connection
· The adjustable parameters include compression frequency, depth, mode, date and time, data transfer, and language
· Easy device access through USB, Bluetooth, and Wi-Fi

Safe and effective

Slow start, giving enough time for your body for adaptation to compression, preventing heart fractures.
3D compression combines the advantages of cardiac pump and thoracic pump, decreasing the impact of compression.

Improved CPR quality

The slider and buckle system wraps securely around the patient’s chest to ensure safe & high quality CPR to achieve a great Chest Compression Fraction (CCF).
Extend the reach of care by allowing the treatment of cause during CPR.

30:2 & continuous compressions
Conform to the latest AHA and ERC resuscitation guidelines

Adjustable compression depth from 30 to 55 mm continuously

Battery-driven without need for gas supply
Allow operating while it’s charging

Compact & lightweight (3.5kg)
Easy to carry and quick install

RTCA/DO-160G approved for using in helicopter

Synchronized Therapy

IP44, Anti-shock

anti-interference, dust and water spray resistant, designed for out-of-hospital transport
